TryIndependentMindsfreefor1monthtoaccessthisfeature.MacDonald's
proposal for democratic architecture are based on four
principles: that every human being has a right to an
affordable home; that people should be able to manipulate
their residential environments, for expanding and dividing
spaces to changing facades easily and inexpensively; that in
deciding where and how to construct housing every effort be
made to prevent damage to the environment; and last, that
residential design must express the multiplicity of society,
not some ideal or political ideology.
