Also in Egypt was the discovery of dog catacombs containing 8 million mummified puppies and dogs, which are thought to have been offered to Anubis, the jackal-headed god of death. There seem to be as many theories of when, where and how dogs became domesticated as there are scientists and scholars to debate the subject. Both paleontologists studying the fossils of our ancestors and anthropologists documenting the diets of indigenous people today say the picture is a bit more complicated.

IntroductionDespiteconsiderableeffortstounderstandthetimingandloc The remains – a dog, a man, and woman, along with several decorated objects made from antler, bone, and teeth – date back to the Paleolithic era, around 14, years ago. Post your comment. High copy numbers in central regions of the globe relative to in Australia, Arctic Asia and Arctic America form a pattern that broadly matches the approximate maximum spread

of prehistoric agriculture Diamond and Bellwood, Figure 1c. The genomics signature of dog domestication reveals adaptation to starch-rich diets. If you work or live closely with animals, you have this bond. The popular embrace of a Paleo diet, Ungar and others point out, is based on a stew of misconceptions.
